### **DETAILED ACTION**

Claims 7 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 7, “said housing” and “said pivot axis” lack antecedent basis.

As to claim 12, “said housing” lacks antecedent basis.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Matty et al (col. 4, lines 20-30) and Darrow (col. 6, lines 50-60) each teach measuring wheel slip of a railroad wheel, but neither employs a sensor roller that engages the slipping/sliding wheel of interest to perform the calculation provided on the last 5 lines of Applicant's claim 1 or last 6 lines of Applicant's claim 15.

Berndt teach a railroad wheel detector 10.

Hoskins, Jr. teach testing railroad wheels.

Nowogrodzki teaches testing wheel wear of a railroad wheel.

As to claim 1, note was made of the combination of “wheel traveling along said track engages said roller” (line 4) in combination with the last five lines of this claim with remaining claim limitations. As to claim 15, note was made of the combination of “wheel traveling along said track engages said roller” (line 4) in combination with the last six lines of this claim with remaining claim limitations.
